OmniDoc Universal Document Previewer

Official Product Manual & Specification Guide

Version: 1.0.0 (Release) | Engine: Tauri 2.0 + Rust Machine Code

---

1. Core Philosophy and Capabilities

• Lightning Cold Startup: Launches in less than 0.3 seconds using OS native viewports.

• Extreme Lightness: Package size under 15MB, eliminating heavy Electron runtimes.

• 6-in-1 Document Engine: Markdown, Plain Text, Excel, Word, PowerPoint, and PDF.

• Live Spreadsheet Math: Click-and-drag multi-cell selection with instant SUM and AVG.

• Privacy First: 100% offline document parsing with zero cloud data uploading.

2. Supported Document Format Matrix

XLSX / CSV : Multi-sheet switching, live SUM / AVG / MIN / MAX selection math.

PPTX : Slide filmstrip preview, keyboard arrow flipping, fullscreen presentation mode.

DOCX : High fidelity contract and article layout, tables, custom zoom controls.

PDF : High-DPI page rendering, page navigation, zoom, and continuous scroll.

MD : GitHub-style code syntax highlighting, task lists, and auto-generated TOC.

TXT : Intelligent auto-detection for GBK and UTF-8, zero Chinese garbled characters.
